Biography

Anthony (Tony) Martin is a Professor of Practice in the Department of Environmental Sciences at Emory University, where he has taught a wide variety of undergraduate courses in geology and the environmental sciences. He has a Ph.D. in Geology from the University of Georgia and is a geologist and paleontologist. His research specialty is ichnology, the study of modern and ancient traces caused by animal behavior, such as tracks, trails, burrows, and nests. He has published more than 150 research abstracts and articles on a variety of modern and fossil traces and is the author of seven books, including *The Evolution Underground*, *Dinosaurs Without Bones*, and *Life Traces of the Georgia Coast*. He is a long-time advocate of public engagement in science as a speaker and writer. In 2014, in recognition of his accomplishments in scientific exploration and outreach, he was elected as a Fellow in The Explorers Club and a Fellow in the Geological Society of America.
